

MAGTEK®

SECURITY FROM THE INSIDE

NEW MAGTEK MICRSafe READER (PLUG & PLAY) NO DRIVERS REQUIRED

MICRSafe

Single feed. Compact design. MICR w/ SCRA. Optimised to reduce transaction time and manual entry errors, the new MICRSafe is a single-feed MICR reader with a reliable and durable design. Ideal for retail applications where fast and accurate cheque MICR

line reading is required, the MICRSafe offers a range of interfaces options, including connectivity to the most popular POS terminals. With a simple drop-and-push cheque feed movement, the MICRSafe significantly speeds cheque verification and conversion.

The MICRSafe enables retailers to easily format the MICR data to match any application input requirements. In a single pass, the MICRSafe reads E13B and CMC7 MICR fonts and connects to banking teller workstations or POS terminals through a USB interface providing output for HID/ keyboard emulation or VCOM based applications. Designed for multi-use banking and retail POS environments, the MICRSafe also offers an integrated 3-track MagneSafe™ secure card reader authenticator to read ISO and AAMVA standard credit and debit cards and ID cards. This highly dependable device will deliver superior performance throughout years of daily use.
